

## Your provider has recommended that you receive the Empower™ Hereditary Cancer Test.

Your insurance policy may require that you first schedule a call with a genetic counselor to be considered for coverage for the test. The call is brief and it can be done at a time that is convenient for you.

## Next steps:

- 1** You will be contacted by a genetic counselor to schedule a call.

- 2** You must complete this call to be considered for insurance coverage for the test.

- 3** If your insurance does not cover your test, Natera is committed to working with you to make this full test panel affordable to you. No changes to the test order are necessary. Natera offers self pay pricing and patient financial assistance programs.

The test described has been developed and its performance characteristics determined by the CLIA-certified laboratory performing the test. The test has not been cleared or approved by the US Food and Drug Administration (FDA). Although FDA has generally not enforced the premarket review and other FDA legal requirements for laboratory-developed tests in the US, certification of the laboratory is required under CLIA to ensure the quality and validity of the tests. CAP accredited, ISO 13485, and CLIA certified.
