

Empower™
Hereditary cancer test

Dear _____,

I recently had the Empower™ Hereditary Cancer Test by Natera, and received results that can be important to you. The test screened my DNA for gene mutations that are associated with an increased risk for developing hereditary cancer. It determined that I have a mutation in at least one of these genes. This mutation runs in families, which is why I want to make you aware of my result and an option for you.

Genetic testing is available to help determine whether you inherited the same mutation that I have. It is important to know this information because we could be at a higher risk for developing cancer in the future, even if our family members have not had cancer. For many of the genes tested, there are ways to stay alert about cancer risk including increased cancer screening frequency, risk reducing therapies, or lifestyle changes.

Natera offers a family testing program that will allow you to receive genetic testing at no additional charge (visit natera.com/Empower for more details). A copy of my test result with more information is attached for you to review with your healthcare provider. You will need this information if you decide to take the Empower test. Natera also provides complimentary genetic information sessions to answer your questions and provide additional educational resources.

I hope this information is helpful. If you decide to move forward, ask your provider to call the number below to order your Empower test.

Sincerely,

[Enclose Empower test results]

The test described has been developed and its performance characteristics determined by the CLIA-certified laboratory performing the test. The test has not been cleared or approved by the US Food and Drug Administration (FDA). Although FDA has generally not enforced the premarket review and other FDA legal requirements for laboratory-developed tests in the US, certification of the laboratory is required under CLIA to ensure the quality and validity of the tests. CAP accredited, ISO 13485, and CLIA certified. © 2020 Natera, Inc. All Rights Reserved.
